

BOFLORA™

Unique air purification product
for a healthier work environment.

Be original

Are your employees often dull at work? Are they quickly distracted and do you see them yawning, and their productivity decreases over the course of the day? This may indicate a lack of fresh air.

Printers and computers ensure that fungi, bacteria and chemicals are suspended in the air.

BOFLORA has the perfect solution for:

THE BOFLORA CLIMATE CABINET, A PLANT TRAY AND AIR TREATMENT SYSTEM IN ONE.

AIR PURIFICATION

The BOFLORA Climate Cabinet integrates an air filter, air ionizer and ultra violet cleaner into one professional system. This system is a unique BoAirCleaner with an air cleaning capacity of 25m³ or 50m³ per hour. By expanding the number of BoAirCleaners in the cabinet, there is sufficient capacity for each room.

He purifies the air at the office of bacteria, viruses, fungi, pollen and dust particles. In this way you not only prevent the spread of diseases and allergies, you also create an atmosphere in which you and your employees can stay sharp and productive throughout the day.

Hidden beneath a bed of environmentally-friendly artificial plants, the BOFLORA Climate Cabinet quietly and thoroughly does its job.

OUR PRODUCTS

BO SMALL

- 400x400x800 (lxwxh)
- 1 built-in BoAirCleaner
- Air flow rate I: 25m³ / hour
- Airflow mode II: 50m³ / hour

OTHER OPTIONS

■ Changing plants according to choice or by season

You can determine in advance how and how often you want to adjust the green.

■ Odor addition

Choose from a rich palette of exclusive scents that give your space a special atmosphere.

■ Ambient lighting

Directly or indirectly, BOFLORA only applies the most economical LED technology.

■ Background music

Using Bluetooth, you can play music wirelessly from a mobile phone through the built-in speaker.

■ Sizes & colors

The BoFlora climate cabinet is available in various colors and structures, such as wood look and concrete look.

GREEN AT THE WORKPLACE

More and more the realization is growing that people perform better, heal better and learn better in people-friendly spaces with sufficient daylight and fresh air. Research has convincingly shown that plants make an important contribution to this. Green at the workplace and at central locations in the building does more than just increase the atmosphere. It makes a substantial contribution to the health of your employees. But by no means every company has the means to create a beautiful new green building, certainly not in the SME sector. The BOFLORA Climate Cabinet offers a solution. This is a smart air purification system disguised as a plant cabinet, where you can assemble the green yourself. You can choose from a wide range of environmentally friendly artificial plants and flowers, which you can change several times as you wish. You do not have to worry about it, and your workspace always has a fresh, familiar and inspiring appearance.

EVERY COMPANY IT'S OWN UNIQUE BOFLORA CLIMATE CABINET

No company is the same, that is why Boflora delivers its products and services entirely to measure. This is done in the form of a service contract of three years for a fixed low monthly amount.

Feel free to contact us to discuss the possibilities.
